Experience

Lookify / Technical Co-founder

December 2019 - Present

As technical co-founder of reverse phone number lookup platform Lookify.io:

- Architect and maintain core B2C/B2B web and API platforms
- Build and keep compliance portal up-to-date with new requirements
- Develop, release, and manage iOS and Android apps
- Create integrations for CRMs, connector tools, and MCPs
- Work with co-founder to create operations systems for maintenance, security, compliance, task management and customer support

Moonshot / Lead Developer

October 2025 - Present

As the lead developer at Moonshot, I work on two different teams:

FlowOS

- Manage FlowOS team: work with stakeholders and enterprise clients, run daily meetings, delegate engineering tasks
- Architect ELT pipelines that move ad-platform data into OLAP databases for attribution analytics and reporting

Moonshot Agency

- Build custom CMS platforms, client-platform integrations, and marketing funnels
- Work with clients to implement data and reporting solutions

LeadLine / Web & Mobile App Developer

April 2015 - October 2025

- Led the development of multiple SaaS platforms using AWS, React, React Native, Node.js, Laravel
- Built and maintained iOS and Android apps using React Native
- Implemented agile workflow and project management systems
- Performed AWS system administration and server upkeep

Education

University of Arizona / Computer Science

August 2011 - May 2015, Tucson, AZ

B.S. Coursework included: automata, proofs, discrete math, algorithms, linear algebra, operating systems, web development, object oriented programming
